

Journal of Mathematical Biology

Volume 23 1985/1986

Editorial Board

K.P. Hadeler, Tübingen; S.A. Levin, Ithaca, NY (Managing Editors)

H.T. Banks, Providence, RI
J.D. Cowan, Chicago, IL
J. Gani, Santa Barbara, CA
F.C. Hoppensteadt, Salt Lake City, UT

D. Ludwig, Vancouver
J.D. Murray, Oxford
T. Nagylaki, Chicago, IL
L.A. Segel, Rehovot

Advisory Board

S. Amari, Tokyo
R.M. Anderson, London
M.A. Arbib, Amherst, MA
H.J. Bremermann, Berkeley, CA
W. Bühler, Mainz
C. Clark, Vancouver
B.D. Coleman, Pittsburgh, PA
P. Colli-Franzone, Pavia
P. de Mottoni, Roma
O. Diekmann, Amsterdam
K. Dietz, Tübingen
P.C. Fife, Tucson, AZ
W. Fleming, Providence, RI
S.P. Hastings, Buffalo, NY
W. Jäger, Heidelberg
F. Kappel, Graz
S. Karlin, Stanford, CA
S. Kauffman, Philadelphia, PA

D.G. Kendall, Cambridge
N. Keyfitz, Cambridge, MA
J.F.C. Kingman, Oxford
N. Kopell, Boston, MA
R.M. May, Princeton, NJ
R.M. Miura, Vancouver
G. Oster, Berkeley, CA
H. G. Othmer, Salt Lake City, UT
L.A. Peletier, Leiden
A.S. Perelson, Los Alamos, NM
T. Poggio, Cambridge, MA
P. Richter, Bremen
J.M. Rinzel, Bethesda, MD
K. Sigmund, Wien
E. Teramoto, Kyoto
J.J. Tyson, Blacksburg, VA
D. Varjú, Tübingen

Journal of Mathematical Biology

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither

the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA. Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US \$ 0.20 per page, or a minimum of US \$ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0303-6812, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Other regulations. Authors publishing in this journal can, under certain conditions, benefit from library and photocopy fees collected by VG WORT. Authors of German nationality and those resident in the Federal Republic of Germany or Berlin (West), as well as citizens of Austria, Switzerland and member countries of the European Community, may apply to Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.

Table of contents

No. 1 1—136 issued on December 13, 1985

No. 2 137—284 issued on February 14, 1986

No. 3 285—394 issued on April 10, 1986

Akin, E., see Cressman, R., et al.	221
Alexander, J. C.: Spontaneous oscillations in two 2-component cells coupled by diffusion	205
Andrietti, F.: Two-dimensional standing gradient osmotic flow: a general- ization of the „isotonic convection approximation“	305
Asmussen, M. A.: The dynamics of interlocus associations in the three locus hitchhiking model. 1. The three-way linkage disequilibrium function	285
Baer, S. M., Tier, C.: An analysis of a dendritic neuron model with an active membrane site	137
Bertsch, M., Gurtin, M. E., Hilhorst, D., Peletier, L. A.: On interacting populations that disperse to avoid crowding: preservation of segregation	1
Brokate, M.: Pontryagin's principle for control problems in age-dependent population dynamics	75
Busenberg, S., Mahaffy, J.: Interaction of spatial diffusion and delays in models of genetic control by repression (Erratum)	283
Coutsias, E. A., see Perelson, A. S.	361
Cressman, R., Dash, A. T., Akin, E.: Evolutionary games and two species population dynamics	221
Cushing, J. M.: Equilibria in structured populations	15
Dash, A. T., see Cressman, R., et al.	221
Donnelly, P.: Dual processes and an invariance result for exchangeable mod- els in population genetics	103
Ermentrout, G. B.: The behavior of rings of coupled oscillators	55
Grindrod, P., Sleeman, B. D.: A model of a myelinated nerve axon: thresh- old behaviour and propagation	119
Gurtin, M. E., see Bertsch, M., et al.	1
Hannsgen, K. B., see Tyson, J. J.	231
Hilhorst, D., see Bertsch, M., et al.	1
Hofbauer, J.: The selection mutation equation	41
Iwasa, Y., see Liu, W., et al.	187
Kooijman, S. A. L. M.: What the hen can tell about her eggs: egg develop- ment on the basis of energy budgets	163
Levin, S. A., see Liu, W., et al.	187
Liu, W., Levin, S. A., Iwasa, Y.: Influence of nonlinear incidence rates upon the behavior of <i>SIRS</i> epidemiological models	187
Mahaffy, J., see Busenberg, S.	283

Peletier, L. A., see Bertsch, M., et al.	1
Perelson, A. S., Coutsias, E. A.: A moving boundary model of acrosomal elongation	361
Plant, R. E., Wilson, L. T.: Models for age structured populations with distributed maturation rates	247
Radcliffe, J., Rass, L.: The asymptotic speed of propagation of the deterministic non-reducible n -type epidemic	341
Rass, L., see Radcliffe, J.	341
Rogers, T. D., Yang, Z., Yip, L.: Complete chaos in a simple epidemiological model	263
Scalia-Tomba, G.: The asymptotic final size distribution of reducible multi-type Reed—Frost processes	381
Sleeman, B. D., see Grindrod, P.	119
Tang, B.: Mathematical investigations of growth of microorganisms in the gradostat	319
Tier, C., see Baer, S. M.	137
Tyson, J. J., Hannsgen, K. B.: Cell growth and division: a deterministic/probabilistic model of the cell cycle	231
Webb, G. F.: A model of proliferating cell populations with inherited cycle length	269
Wilson, L. T., see Plant, R. E.	247
Yang, Z., see Rogers, T. D., et al.	263
Yip, L., see Rogers, T. D., et al.	263
